Make an eligibility check on the request

The check is on the eligibility of the request and the completeness of the attached documents

Verification of the merits

It includes a substantive examination of the attached documents, as well as certification check for which a record is drawn up.

In the protocol the conformity of the object is established by:

1. the legislative acts applicable to the construction upon putting it into operation, or the requirements of the construction and technical regulations and fire safety norms in force at the time of the inspection;

2. fire safety rules and standards for the operation of the sites in force at the time of the inspection.

Based on the results of the protocol check, the conformity or non-compliance of the site with the requirements of the fire safety rules and regulations is assessed as follows:

1. the site complies with the requirements of the fire safety rules and standards - there is full compliance with its actual status with fire safety rules and standards and conditions for their observance have been established;

2. the site does not comply with the requirements of the fire safety rules and regulations - there is non-compliance with the rules and fire safety regulations or no conditions for their observance

Issuing / refusal to issue a certificate

Based on the certification audit protocol the director of the Regional Directorate of Fire Safety and Civil Protection - Ruse issues or refuses the issue a certificate.
